## GIVING YOU THE EDGE IN PATIENT CARE WHEN IT COMES TO 3D-PRINTED PATIENT AIDS

Breaking the mould: The **web-based Mecuris Solution Platform** for 3D-printed prostheses and orthoses enables O&P professionals to offer the very best in patient care. In just **three easy steps**, you can order CE-compliant, perfectly fitting prosthesis under your own label online. **Takeing customer satisfaction to new heights** by involving the wearer in the design process is another benefit. Creating bespoke patient aids has never been easier.

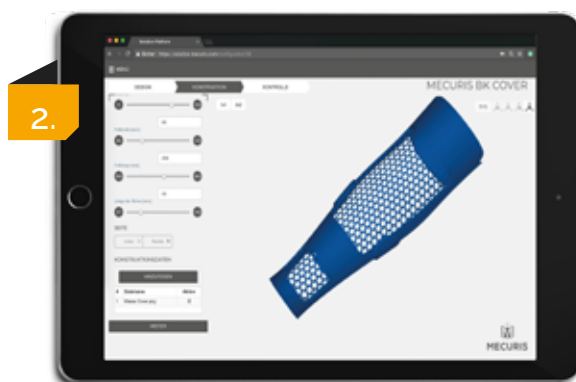

### CO-CREATED DESIGN

- Plenty of scope for individual design according to wearer preferences
- Choose from a range of surface structures and colour combinations

### CREATION

- Enter the relevant measurements for production
- Calculate the individual patient aid dimensions
- Check the dimensions using 2D and 3D visualisation

### ORDER MANAGEMENT

- A measurement sheet is provided automatically, containing all relevant technical specifications for approval
- The custom-made patient aid is delivered within ten working days
